

Sprint Retrospective

Week ending 31st March 2017

What went right?
<ul style="list-style-type: none">• Front end pages were developed. These included; sidebar panel, login/create account, dashboard and portfolio pages.
<ul style="list-style-type: none">• Laravel was set up successfully.
<ul style="list-style-type: none">• API was found that connects to the ASX and able to pull data successfully.
What hindered the Sprint?
<ul style="list-style-type: none">• Lack of communication within the team
<ul style="list-style-type: none">• Learning the backend framework after setting up Laravel
<ul style="list-style-type: none">• CSS wasn't working on one of the members github accounts. Slowed down the process and had to be done locally to allow progress to be made
<ul style="list-style-type: none">• Setup SQLite, this is the database software we are going to use for the backend and data handling.
What should we try next time?
<ul style="list-style-type: none">• Increased communication within the team and with the client
<ul style="list-style-type: none">• Clear defined roles/responsibilities for the duration of the Sprint
<ul style="list-style-type: none">• Have a more specific, step by step planning approach to reduce the likelihood for swaying off scope and off Sprint tasks
