DATABASE/SQLITE INSTALLATION

PRESENTER: MATTHEW RINGIN

DISCUSSION	Andrew did not have SQLite installed and was having trouble with the front end. He received errors relating to the database. In the meeting, Matthew explained the steps needed to correctly install the database program so that it doesn't break any of the current repository. Andrew downloaded the SQLite GUI and also the binaries needed for the database to work. In addition, he learnt how to use the GUI and modify tables if need be.	
CONCLUSIONS	Matthew ran Andrew through the installation of SQLite and getting the database up and running. Andrew then created a mock account so that he could successfully log into the system and continue working on the front end design for the project.
